

## Standalone / Desktop Finger Print Reader

---

Fingerprint Recognition by Hamster III from Secugen is a fingerprint scanner for computer Security featuring superior performance, accuracy, durability based on unique Fingerprint Biometric Technology.

It can be plugged into a computer separately with your mouse. It is very safe and convenient device for security instead of password that is vulnerable to fraud and is hard to remember.

Use Hamster with your choice of compatible biometric software for authentication, identification and verification functions that let your fingerprints act like digital passwords that cannot be lost, forgotten or stolen.

Standalone Finger Print Reader

dtAIMS (Dachi Time Attendance Information Management System) provides Software for time office and Attendance software for Educational Institutions. This software offers you foolproof method of recording time attendance of employees / students and generates number of reports i.e., attendance, absentee, late comers, early goers and monthly attendance register etc.

### Technical Specification

|                             |                                |
|-----------------------------|--------------------------------|
| Fingerprint Sensor          | OPP 01 (optical)               |
| Dimensions                  | 25.3(W) x 40.7(L) x 67.7(H) mm |
| Scanner Resolution          | 500 dpi                        |
| Verification Time           | Less than 1 second             |
| Operating Temperature       | 0° to 40°C                     |
| Operating Humidity          | < 90% relative, non-condensing |
| Certifications              | USB 1.1                        |
| Supported Operating Systems | Windows 98/Me/NT4/2000/XP      |
| Dimensions (mm)             | EMI, FCC, CE, MIC              |

## Features

- Fast and Perfect Authentication through excellent Algorithm.
- Compact, lightweight and portable.
- High-performance, maintenance-free optical fingerprint scanner.
- Resistance to scratches, impact, vibration and electrostatic shock.
- Latent print image removal (does not accept prints left behind).
- Encryption of fingerprint templates

---
